Introduction

Hi, my name is Winson Yeung and thank you for getting **Backlinks Inner Circle**.

Nope – don't worry, I'm not gonna bore you with introductions about myself or anything. If you ARE interested about me as a person and what I do online, you can always **check out my blog at <http://winsonyeung.com>** and **follow me on Twitter and Facebook** to check out the latest update regarding my progress in SEO and Internet Marketing as well.

In this report I have **interviewed the top 10+ internet marketers** who are very well known in the world of SEO and Backlinks from WarriorForum and BacklinksForum. I'm pretty sure that if you are a frequent forum member, you should have come across names such as Terry Kyle, Daniel Tan, Kok Choon, Steve Aylor, Pat Jackson, Gary Becks, David Eisner, Andy Fletcher and maybe me (Winson Yeung) as well 😊

If not, you are probably missing out on a lot of knowledge that you can learn from them. Anyway, I am aiming to give you short, simple and a bullet train system via the email interview where you can learn from the top SEO gurus of **what's their main strategies, benefit of their product/service**, how it will help you in term of **ranking better in the search engine** and what's **mistakes to avoid when you are doing your SEO** to prevent yourself from getting hurt in the Search Engine Ranking Results.

Meanwhile, let us concentrate on what this report is all about: SEO Interview

BUT BEFORE THAT... Let's Get Connected Via Social Media!

**Best Regards,
Winson Yeung**

Interviewer 1: Terry Kyle's Email Interview

1. Can you give us some background on yourself?

In the 1990s I worked as a copywriter and creative director in Australia for clients like Pepsi, McDonalds, IBM, Kellogg's and Panasonic. Sounds great in theory but it was a difficult existence dealing with impetuous/incompetent/unethical clients and staff.

When the last ad agency that I worked for folded, I launched my first Internet Marketing career, selling a portfolio of nonfiction eBooks. The business went OK but never reached the level of financial reward that I had hoped for and within a few years, I pretty much closed it down.

The important emotional lesson that I learned was to not (in your mind) equate success with a specific product or service but rather be attached to success, not a certain product. In early 2008, I made a Rocky-like comeback with a book on 'small business ideas' on Amazon, joined the Warrior Forum and haven't looked back (much) since.

2. How did you first get started in Search Engine Optimization (SEO)?

By the end of 2008, when my second Internet Marketing career was underway, I became fed up with terrible rankings, losing my shirt on PPC and generally failing pretty badly in IM. I decided that in 2009, I would do whatever it took to develop mastery of SEO and Google Organic rankings.

3. Background of your product/service and how will it benefit the reader?

I was reading one of Steve Aylor's early versions of "Backlink Goldmine" and a huge light bulb went off for me about how a whole spinoff strategy could be used – in short, I had 'spotted a gap' and developed the tactics described in The Backlinks Black Belt Report which was released at the end of July 2009.

From then on project after project has continued that earlier momentum. In partnership with Tom Goodwin, the co-owner of BacklinksForum.com, I provide 400-site forum Link Packets a month (which we limit to 30 users per packet per month), links on groups of high PR homepages, corporate SEO (soon probably) and an advanced tactical guide on new techniques that I am (successfully) experimenting with now: Backlinks Hydra.

Backlinks Hydra ==> [Click Here To Check Out!](#)

HomePage Backlinks ==> [Click Here To Check Out!](#)

Backlinks Forum ==> [Click Here To Check Out!](#)

All of these products and services can help readers in one way: Traffic through high Google rankings.

4. How did you come up with the idea for this kind of product or service?

There was nothing like it/them in the marketplace at the time/now and I wanted such a service or services for myself so it seemed logical that others would (normally a marketing error) but other Internet Marketers were expressing similar frustrations as me in forum chatter. This illustrated the need for the services and products that I was thinking of creating.

5. Who is your targeted market for such product or service?

Entrepreneurs interested in getting and maintaining great rankings in Google's Organic search results. That covers a pretty wide age/sex demographic!

6. What are the 3 most important SEO strategies you like to use for better ranking?

(1) I like to buy and 'repurpose' aged high PageRank domains as these will rank much faster than brand new domains.

(2) I also love backlinks from high PR PAGES, not necessarily domains, as these can be extremely potent and are one of my favourite SEO weapons.

(3) I am also a frequent reverse engineer of competitors' backlinks through SEO Spyglass and use those sites for backlinks too.

7. Can you tell us about the single most important SEO MISTAKE you should have avoid in the process of ranking high in the search engine?

I'll name three:

1. Varying anchor text in links to a page,
2. Trying to target more than keyword for one page (related to the first one), and
3. Mixing up backlinks URLs to a Money Site between www and non-www versions (splitting the Link Juice across two 'different' pages).

8. Anything you want to add on?

I feel very strongly that Internet Marketers should fully commit to developing specialised expertise and mastery in one area of knowledge – regardless of the niche.

For example, if an Internet Marketer committed themselves to becoming an expert in profitable podcasting or facebook group marketing or conversions tactics and nothing else, they would quickly develop a 6-figure a year business and be able to maintain that, possibly for life if so desired. Specialise, don't generalise. With me, it's in the backlinking area of SEO and that's why I have the success that I do – specialisation!

HomePage Backlinks ==> [Click Here To Check Out!](#)

Backlinks Forum ==> [Click Here To Check Out!](#)

Interviewer 2: Daniel Tan's Email Interview

1. Can you give us some background on yourself?

I started doing online business since like 8 years ago, which I bumped here and there without success. The training paid off though. I am very interested in search engine optimization and has actually dived into this and built a couple of websites. Until 2 years back when I saw there is a demand for search engine optimization service that I started to provide search engine optimization services to people I know.

I started off providing singular services and soon expanded to provide a complete solution. My business grew via word of mouth and referrals from my clients. Very soon, I had a few marketing agencies teaming up, they bring me the business, and I do the work to rank the sites.

2. How did you first get started in Search Engine Optimization (SEO)?

It was not until last year that I started to think that I should share my techniques and findings about SEO. That's when my products start to become a hallmark and important document in SEO industry. Both Backlink Syndication System and Rank Mover took the industry by storm. Rank Mover is the important document that almost every SEO consultant reads.

3. Background of your product/service and how will it benefit the reader?

I first started with Backlink Syndication System, which is a methodology exploiting the nature of syndication from press releases to mass distribute backlinks.

This product is such a success that I receive testimonials from users getting first page ranking overnight, some had told me their website moved up after they were stuck for quite some time and few of them actually made money right off the backlinks they syndicate. It is very amazing to know how fast people see result when they apply the methodology, which I am very happy of course.

I receive questions after questions, like how do they actually move their website's rank, and if Backlink Syndication System is the holy grail to all link building, my answer is no, there is much more to it. Backlink Syndication System is one way to mass distribute backlinks, but in terms of getting well ranked, there are many more factors, so I created Rank Mover, which is a document to describe a PULL procedure that SEO Companies use to pull a website into first page ranking.

This PULL procedure can be executed by anyone, it is a procedure, and within this procedure, there are many things that have to be done in order first, before one can execute the procedure. This document is a very successful product that has changed the way people understand SEO. I had tremendously good response on this document; many claimed it is an important document to read, for whoever wants the true view of SEO.

4. How did you come up with the idea for this kind of product or service?

After Rank Mover, I got feedback asking if there is any tool I use to automate certain on-page factors. Well, I have many tools in-house, all custom made by my tech team so I decided to make available an on-page checking tool that I use. I coined it to be SEOPressor and decide to release this as a Wordpress plugin.

The product was very successful during Warrior Special Offers launch, it sold over 1,300 copies within a month and I decide to make this available to the public. Now, SEOPressor is in the hands of over 5,000 Wordpress webmasters and it is powering more than 2.5 million pages already. This number grows everyday and when you are reading this, it could well exceed 10 million, watch the news.

Results? Users of SEOPressor has claimed overall ranking improvement, solidification of their ranking and they start to rank faster and easier, stay longer at top ranks and overall visitor staying time and conversion increase. Exactly, when you have good on-page optimization, ranking, backlinks, traffic, conversion etc, all effects are multiplied.

SEOPressor ==> [Click Here To Check Out!](#)

Backlinks Syndication System ==> [Click Here To Check Out!](#)

Rank Mover ==> [Click Here To Check Out!](#)

Keywords Quantifier ==> [Click Here To Check Out!](#)

5. Who is your targeted market for such product or service?

People buying my products are mostly SEO Consultants and business owners. Most of them are service providers like me. I try to have my products designed for this group of people as they are going to benefit the most from my advanced discussions.

I find it quite hard to communicate with new people when they have too much misconceptions about SEO, it takes time to unlearn and I have not have a course that will do the unlearning process, so I decided to target people who are already an SEO experts and share with them my various insights and trade secrets.

Of course, I am now developing a course that will have all levels taken care of, from new end user to advanced business providers. This course will is in the working now and should be released with it is ready.

6. What are the 3 most important SEO strategies you like to use for better ranking?

Coming to this, I think the 3 most important SEO factors are:

- 1. Keyword Selection,**
- 2. On-page Optimization**
- 3. Off-page Optimization**

Keyword selection is something 99% of the people got wrong. My recent product, Keyword Quantifier serves to deliver the correct way to quantify competition. It is a methodology I use to find out the TRUE count of competition.

My whole SEO business is literally built upon this TRUE Count and I never thought I would be willing to disclose this trade secret, but since my following has grown and I can't stand when people puts faith in the wrong count and invest money and time into the wrong keyword, I decide to release this to my closest followings.

Keyword Quantifier proves competition from unquoted search to be wrong, quoted search to be wrong and the almighty all-intitle search to be wrong 70% of the time. I believe with Keyword Quantifier released, my followers will have the complete tools in hands to dominate the search engine and improve their business.

7. Can you tell us about the single most important SEO MISTAKE you should have avoid in the process of ranking high in the search engine?

The deadliest mistake about SEO is to believe in blackhat methods. Never ever believe in blackhat methods. They are not only a waste of time, but will bring detrimental effects to one's business.

For example, Google tweaked their algorithm 400+ times in 2009, that's like 1 tweak every day, trying to keep up and game the system is futile. We should focus on the fundamentals.

Recent Google May Day (it's called Google Caffeine) slapped a lot of websites; guess what, my clients' site actually improves in ranking and traffic. We saw overall traffic improvement of 10% across the sites I handle. Saying about this, I personally welcome slaps and I think [this needs to be finished]

8. Anything you want to add on?

Google does a great job organizing the index and locating real gems. In SEO, you want to be the gem Google will rank.

Interviewer 3: Kok Choon's Email Interview

1. Can you give us some background on yourself?

People in Warriorforum refer me as Kok or KKChoon, but my buddies call me Kok Choon, it's my first name! :) My Last Name is Kow, which only few people know about it. I've been online making money and working from home for almost 4 years, most probably will move to an office before the year end, business is growing strong now.

For the past 3 years, my core business is Affiliate Marketing with SEO; Beginning of this year, I've shift my business from affiliate marketing to creating my own products and building a strong community and my own list.

2. How did you first get started in Search Engine Optimization (SEO)?

I first get started with SEO when I needed traffic for my business software site, and for the very first time, I've learned to rank for some targeted keywords with article and directory submission.

However, during that time I wasn't getting much traffic to my site, but they do convert well with the targeted keywords. After that, I stumble upon Dan Theis SEO Fast Start:

<http://www.seofaststart.com/>

Dan Theis is my very first SEO Master; I've learnt a lot important stuff from him.

3. Please give our readers some background on what your product, service or membership is/are about?

We have launched an Advanced SEO Traffic e-course training - Nuclear Traffic Maximizer, along with one of the most desirable automated profile submission software - Nuclear Link Blaster.

Nuclear Traffic Maximizer is also a Powerful SEO Strategy Training Guide that will boost your backlinks ranking power exponentially, and maximize the traffic to your website; While Nuclear Link Blaster will help you automate the NTM strategy and make it possible for mass backlinks automation at the lowest cost ever.

Nuclear Traffic Maximizer ==> [Click Here To Check Out!](#)

Nuclear Link Blaster ==> [Click Here To Check Out!](#)

4. How did you come up with the idea for this kind of product or service?

It doesn't matter how many links we acquired, it will never be enough to rank for competitive keywords, that's why we came out with the NTM strategy. However, without some kind of automation tools, we can't possibly make this happen, that's why we developed Nuclear Link Blaster to automate the process, so the strategy became achievable.

5. Who is your targeted market for such product or service?

Nuclear traffic Maximizer is for anyone who doesn't already receive enough targeted traffic to their website, I'll show all my secret strategy to massive traffic and ranking power!

Nuclear Link Blaster is the most powerful profile link automation tool, you can virtually add an unlimited number of platforms into the system, and automate any kind of customized profile sites! The best part of this software - You can run multiple threads and complete the job in the shortest time!

6. What are the 3 most important SEO strategies you like to use for better ranking?

My core strategy is profile link, accompany with blog networks and bookmarking. Google seems to love high PR backlinks, especially backlinks surrounded with text, some called it in-context link or contextual link.

When we talk about PR, there are 2 types. The most valuable backlink - of course is High page PR backlinks, but these types of backlinks don't come cheap, and it is not easy to come by. Terry Kyle's Backlink Hydra is the best resources to create these types of backlinks.

The other is domain PR, which is less valuable but proved by myself works pretty well. Google seems to filter most of the profile links with Domain PR0, if you really want to benefit from profile links, you need to filter at least domain PR1, and use indexing tools like backlink index express, backlink energizer or link juice maximizer to get your profile link index.

We are also in the process of creating schedule ping software that simulates natural pinging, which can greatly increase the index rate as compared to conventional pinging. In summary, my core backlink strategy is

1. Profile Links to money site
2. Blog Network Article Links
3. Profile Links to My Article Links (backlink boosting)

After that send all profile links and backlinks URLs to ping software / indexing script.

7. Can you tell us about the single most important SEO MISTAKE you should have avoid in the process of ranking high in the search engine?

I think the most important mistake of most SEO beginners is - picked the wrong keyword.

When I say the wrong keyword, I meant keyword with a lot of competitions but very less traffic! That's the biggest mistake of all. In my Nuclear Traffic Maximizer, I've spent 20% of the content just dedicated on keyword research.

Most people will endlessly pursue the power of ranking, more link juice, more link power. My advice is - go for extremely low competition keywords with decent search traffic, you'll see the money a lot faster. We need money to continue the journey in IM, that's why profit superseded everything

8. Anything you want to add on??

I have suffered a long time with low income during the first 2 years of making money online, and I see many are still following my steps. So please take this advice, I'm sharing this from the deepest of my heart: Stop playing with tools, stop paying for courses! Follow ONE system that you really like, give yourself 180 days dedicated to that method, and SCALE up every bit of success you have!

I need to repeat this, SCALE UP every bit of success you have, you'll be surprised how fast you can reach that \$1,000 mark! Just SCALE UP what makes you \$100, do it 10 times, and you get \$1,000! Don't think for a moment - duh, that's just too little money; I must learn some secret stuff that will make me \$10,000 every month!

Stop thinking nonsense! There is no secret in making \$10,000, just scale up what you've now and you get your \$10,000 / month!

Nuclear Traffic Maximizer ==> [Click Here To Check Out!](#)

Nuclear Link Blaster ==> [Click Here To Check Out!](#)

Interviewer 4: Steve Aylor's Email Interview

1. Can you give us some background on yourself?

45 yrs old - Married 18 yrs with 4 kids - ages 16 / 13 / 10 / 8 ... 3 girls 1 boy :-) Reside in Southern California - Orange County. 24 yr veteran of the Insurance industry - specializing in commercial business insurance and risk management for the Information Technology, Construction and Not For Profit sectors. Marketing products for these clients became a passion. My passion for marketing led me online.

2. How did you first get started in Search Engine Optimization (SEO)?

Marketer David Frey introduced me to Internet Marketing through his mailing list, and ever since I wanted to rank a few websites ... I was smitten. I devoured hours and hours of information from the warrior forum. From there I tested and tried many things. Discovered things that worked for me, automated it, and then scaled it.

3. Background of your product/service and how will it benefit the reader?

I quickly learned that backlinks are one of if not THE critical factor in achieving page one SERPS. I got frustrated with the backlink strategies and tools available at about the same time I became backlink enlightened, so I set about to make better alternatives. Backlink Goldmine was born.

For Backlink Energizer ... I had spent 3-4 months trying to cobble together a group of FREE Wordpress plugins for a scalable solution to autopost to web 2.0 sites. A friend had shared one idea of indexing links - which then lead me to an idea of how I wanted to get links indexed more reliably, but the FREE tools that existed only did 3/4's or partial aspects of what I wanted to do.

Backlinks Goldmine ==> [Click Here To Check Out!](#)

Backlink Energizer ==> [Click Here To Check Out!](#)

4. How did you come up with the idea for this kind of product or service?

I found a very expensive autoblogging tool and I hacked it to make it do "most" of my new methods of link indexation. After much tweaking - toiling and tracking. I found the things I felt worked well. I then partnered with a good friend and php / wordpress coding guru, and had my ideal software app built around the wordpress syndication engine and codebase.

5. Who is your targeted market for such product or service?

Anyone trying to rank their sites with backlinks or anyone who wants to make the most of the backlinks they have already built. Adsense micro site builders, niche review site builders ... anyone who needs to rank well in the SERPS.

We built our Backlink Goldmine and Backlink Energizer products with the mindset that not every marketer has \$1997 to drop in order to achieve success. We decided to make products that are an extreme value and easy to use for newbie, and that can also scale for advanced marketers as well.

6. What are the 3 most important SEO strategies you like to use for better ranking?

1. Use Keyword rich domain names.
2. Take Massive Action via automated backlinks software.
3. Try and get many "in content", full anchor text links with very focused keywords as the anchor text.

Be prepared to work hard for the long term on valuable money keywords with high competition...

7. Can you tell us about the single most important SEO MISTAKE you should have avoid in the process of ranking high in the search engine?

I believe the single biggest mistake people can make is believing all the forum hype about what NOT TO DO, and that Google bot is a semi-human - living - free thinking entity. It is not. It is a bot - an algorithm. It doesn't know feelings or throw red flags - it just "does" ... what it is programmed to do. The notion of "natural looking" backlinks. The notion of building links too fast.... or too many too fast or, that your links must come from pages that are "relevant" to your keywords in order for those links to have any value.

8. Anything you want to add on?

Pick your target niches and keywords carefully ... this can shorten the path to success and help you have realistic expectations of income for effort. You'll have a good idea of how much work will be needed to dominate the SERPS, and know if the keywords will be worth the efforts financially.

Beware of the silver bullet ... it's still time and effort to achieve SEO results!

Backlinks Goldmine ==> [Click Here To Check Out!](#)

Backlink Energizer ==> [Click Here To Check Out!](#)

Interviewer 5: Pat Jackson's Email Interview

1. Can you give us some background on yourself?

My name is Pat Jackson; I'm 21 years old and live in Melbourne, Australia. I first came online in 2008 looking for a way to make money instead of having a regular job and I found the World of affiliate marketing and SEO and haven't looked back since.

2. How did you first get started in Search Engine Optimization (SEO)?

Well, I first learned about affiliate marketing as a whole through Wealthy Affiliate and then went across to the Warrior Forum and quickly decided that the best way to drive traffic to my websites was to rank well in Google.

From there I just did a lot of research around the various forums and blogs and also did a lot of testing with different methods. Once I began to find some methods that were working well I continued to use them and continued to test new things.

3. Background of your product/service and how will it benefit the reader?

I currently have a couple of products with my partner Gary Becks that will be of interest to anyone within the SEO field. The first is Automated Backlinks Monthly which is basically a series of bots which automate the process in creating profile links at forums and also contextual blog post links (Very valuable) at a couple of different platforms.

It only takes a couple of minutes to set everything up and you can then create links on auto pilot to your websites. Additionally, we provide our users with new sites each month that have been verified by us to ensure maximum efficiency for our users.

It's really beneficial for anyone who values their time in that you can be creating a bunch of links automatically without you even having to be at the computer.

The second product that I have which will be of interest to your readers is Link Juice Maximizer. One very important component of SEO that many people seem to forget about is that after you've created some links to your websites you need to ensure that they get indexed.

If your links aren't in Google's index then they're not going to have any value at all which is obviously going to be detrimental to your SEO efforts. Link Juice Maximizer will accomplish two things;

- 1) It will ensure that a large percentage of your links do, in fact, get indexed in Google's index.
- 2) It will "boost" the power of each and every one of your backlinks. When you submit your backlink url's into Link Juice Maximizer, your links automatically get distributed out to a network of over 700 sites made up of Wordpress blogs, forums, RSS aggregators, Drupal sites and social bookmarking sites all hosted on 360 different C Class IP addresses.

This is obviously going to increase the power of each of your backlinks and help your websites rank higher as a result.

Automated Backlinks Monthly ==> [Click Here To Check Out!](#)

Link Juice Maximizer ==> [Click Here To Check Out!](#)

4. How did you come up with the idea for this kind of product or service?

Well, since the emergence of profile links and how successful they had become I was starting to create a lot of them but it was taking up a huge amount of my time. As such, Gary and I put our heads together and decided to come up with a way to automate the process to free up some time so that we could do the things we enjoy.

After we created Automated Backlinks Monthly we were creating a lot more links than usual so we started looking for a solution to get them indexed and to boost their power. There was already a few backlink boosters on the market at the time, however, each of them had a few problems that were becoming more and more frequent so we started looking for a different solution.

We decided the best way to proceed was to create our own network where we would be in complete control and wouldn't have to be at the mercy of other sites via using properties that we didn't own. From there, Link Juice Maximizer was born.

5. Who is your targeted market for such product or service?

Our target market for both Automated Backlinks Monthly and Link Juice Maximizer is anybody who wishes to succeed in the world of SEO and have their websites ranking high in the search engines.

SEO is something that both myself and Gary do for a living so you can have complete trust in the fact that we will put everything we have into our products and are always looking for new ways for both ourselves and our customers to succeed.

6. What are the 3 most important SEO strategies you like to use for better ranking?

1. On Page SEO - This is the easiest component of SEO but something that many people often overlook. Things like using your main keyword in your h1 tag, using your keywords as ALT text for any images you have, etc.

2. Link Building - Link building is, without a doubt, the most important facet of SEO. In order to rank well in the search engines you need a lot of links from a lot of different sources, there is no way around it.

As of the time of writing this there are a few different types of links I spend most of my time going after. Profile links from high PR forums are very powerful and are something I use on all of my websites. Secondly, submitting articles into private blog networks like Backlinks Solutions, Linkvana, Build My Rank, etc. are also very powerful.

3. Testing - Don't build a certain type of links simply because someone told you they were good. It's very important that you keep testing to see which types of links are giving you the best results and then focus your time on those types of links. It's not a good idea to focus on building links from sources which aren't going to help you.

7. Can you tell us about the single most important SEO MISTAKE you should have avoid in the process of ranking high in the search engine?

As in the previous question, the importance of testing shouldn't be overlooked. Many people will blindly follow advice from people on forums and blogs without testing and as a result, they won't succeed.

It is imperative that you always test and test and test to ensure what you're doing is actually giving you the results that you desire. Once you start to think this way you'll begin to pin point where you're going wrong and what things are working for you. As a result, you'll begin focusing your time on the things that work and your results will be better.

8. Anything you want to add on??

The best piece of advice I could give to someone starting out would be to just get stuck into it. It can be a very daunting experience when you're first starting and you don't know where to begin, but the best thing to do is just to try a bunch of different things and actually do something. I made the mistake when I first started of trying to read as much information as I could without actually doing anything and as a result I didn't have a lot of success early on.

Automated Backlinks Monthly ==> [Click Here To Check Out!](#)

Link Juice Maximizer ==> [Click Here To Check Out!](#)

Interviewer 6: Gary Becks's Email Interview

1. Can you give us some background on yourself?

I'm a young entrepreneur who resides in Atlanta, Ga. I have been involved with internet marketing for about 2 years now and I love every minute of it!

Prior to beginning my career in internet marketing I owned (and still own) a few music studios in the Atlanta area. Due to the fact that all of my offline business was/is pretty much hand off and I have always been somewhat technically inclined I began browsing the internet for ways to earn an extra income online.

In late 2008 I launched my first website which was monetized via the Google AdSense program and I received my first check not long after, from that point on I have been addicted to Internet Marketing and SEO..

2. How did you first get started in Search Engine Optimization (SEO)?

For me it was never a hard decision. I knew from day one that I didn't want to pay for all of my traffic and I wasn't convinced that traffic from social media would ever convert well, so that left me with only one option; SEO..

In the beginning I launched website after website trying to utilize new methods that I had read about on various forums and in eBooks. In the end most of them failed, but those that were successful were very successful so I stuck with and reinvented those tactics. Looking back I learned everything the hard way but it really did pay off in the end...

3. Background of your product/service and how will it benefit the reader?

At the present time I have two products along with my pal Pat Jackson. The first is Automated Backlinks Monthly... This product or service rather has become very popular in a short period of time and it's pretty obvious why, it works! It includes a plethora of extremely simple to use bots that will automate the process of profile linking, blog posting, and soon Web 2.0 account creation/posting and Press release submission...

My second offering is Link Juice Maximizer which in my opinion is a one of a kind service that surpasses every other product/service of it's kind. All real SEO's know that backlinks won't count for much if the search engines don't know that they exist.

What Link Juice Maximizer does is make all of your links count and count for much, much more than they originally would have and it does it all on total auto-pilot. With other products/services you are going either be at the mercy of the Web 2.0 properties that they utilize, have to spend far too much time or money for them to be effective, or they just plain DON'T WORK.

With Link Juice Maximizer we feel that we have addressed all of the problems that other products have and implemented all of the features that they lack...

Automated Backlinks Monthly ==> [Click Here To Check Out!](#)

Link Juice Maximizer ==> [Click Here To Check Out!](#)

All of the products that we create and plan to create are helpful to the readers because we always have one thing in mind, to save you time and to make your online business as hands off as possible...

4. How did you come up with the idea for this kind of product or service?

In regards to both of our services they were created out of pure necessity, nothing more... Whenever we have a new product or service in mind the idea for it comes from the fact that it is something that we need to use for our own sites.

From that point it's mostly a matter of trying to figure out the best way to automate the process of whatever it is that we are trying to do and making it as user friendly as possible. I believe we achieve this very well with all of our products and services...

5. Who is your targeted market for such product or service?

The target market for all of our services is anyone who is interested in making money online via SEO and doing so in the most hands off/automated fashion possible. I believe in working smarter as opposed to harder and that is the idea behind all of our products, to help Internet Marketers manage their time better by using our services to automate processes that would take lots of time and manual labour otherwise...

6. What are the 3 most important SEO strategies you like to use for better ranking?

1.) Keyword Research - This is always a critical step to ranking a website in my humble opinion. Far too many times I have seen people new to IM launch websites targeting keyword phrases that are too competitive for even the most experienced SEO's to rank for and then 3-6 months down the line wonder why they still aren't ranking and receiving traffic.

From my experience keyword research is always the first and most important step to ranking websites in Google... The better you are at it the easier everything else becomes...

2.) On Page SEO - It is always a good practice to optimize your website via on page SEO before moving on to building links. This part of the process is always the easiest for me as almost all of my sites are built using wordpress which is very easy to optimize with the use of the proper plugins (some paid, some free) and settings.

3.) Consistent Link Building - Last but definitely not least is link building which is something that should be done consistently and is best to automate whenever possible in my opinion. Link building could very well be the most important part of SEO there is. I say this because you could never rank a website in any mid/high competition niche without a good link building strategy in place but you could more than likely do so with poor on page SEO or keyword research.

7. Can you tell us about the single most important SEO MISTAKE you should have avoid in the process of ranking high in the search engine?

Well, one of the first mistakes I made in my online career was attempting to create websites based on keywords or niches that I felt I was actually passionate about. Now I am not saying that there is anything necessarily wrong with this as some people might actually be interested in good converting/low competition niches, but in my case I was making sites without giving thought to whether or not I could rank for my chosen keywords.

For instance, one of my first sites was "wiegthlosscentral.blogspot.com". It was a huge failure because it would have taken me forever to rank for the term "weight loss", (something I learned soon after).

Another big mistake I made early on was creating websites with web 2.0 properties as opposed to domains that I owned.. I can't stress enough how important it is as an Internet Marketer to own all of the properties that you plan to monetize in any way. I used to write tons of Ezine Articles, HubPages, and had over 30 or 40 Blogger blogs that I relied on. I didn't realize the err in my ways until the emails started flowing in about what I could and couldn't do with the sites and accounts started being closed..

I also think that buying every SEO software that I saw because I felt I needed it after reading a hyped up sales copy wasn't very smart either. I literally have an entire desktop full of software on my laptop that I have never and probably never will use..

8. Anything you want to add on?

I am a firm believer in only taking part in business endeavours that I believe I will actually enjoy. Unlike many people who are involved with Internet Marketing and SEO I actually love what I do so it's not a job for me.. I love learning new techniques to implement into my overall SEO strategy, I love creating and learning to use new SEO software, I love creating a new site from scratch and seeing it go from nothing to the number one spot!

Every day of my online career is a new adventure that I can't wait to embark upon and I wouldn't have it any other way. I can think of thousands of easier/better ways to make more money but I doubt I would enjoy or be as passionate about any of them as much as Internet Marketing.

That being said I would like to encourage anyone who reads this and is interested in pursuing a career in Internet Marketing to be sure that it is something that they are genuinely interested in as opposed to something that they are doing solely for the purpose of potential monetary gain. It will be too much like work and in the end you will never really succeed (even if you do make a few bucks) because you will never feel truly free...

Link Juice Maximizer ==> [Click Here To Check Out!](#)

Interviewer 7: David Eisner's Email Interview

1. Can you give us some background on yourself?

I've been a full-time internet marketer since December of 2009 and before that, I was a part-time IMer and I worked in various industries and travel around. In IM, my focuses were mainly on PPC and SEO up until December when I decided it would be good to start writing and making a name for myself in the IM niche. Since then, I've been focusing on product creation, list building, SEO, and ultimately helping other people become successful in this industry.

2. How did you first get started in Search Engine Optimization (SEO)?

I first got into SEO at the end of 2008 when I was having success selling a specific eBook and thought I might have better luck getting my site ranked and selling copies that way. While I wasn't successful ranking for terms related to that eBook, I did have some other success with ranking niche blogs. I eventually sold off many of my sites because I needed the cash. In retrospect, I'm not sure I love that choice but hey, we've got to roll with our decisions - no regrets!

3. Background of your product/service and how will it benefit the reader?

Since December, I've created a couple of SEO info products. The first one, and my first product effort overall, was "The Octopus Blog Method." Boiled down to the basics, it explains why and how to make a massive blog and get individual pages on that blog ranked.

It is 95+ pages of step-by-step instructions ranging from setting up Wordpress to intricate details of getting backlinks. I've gotten fantastic feedback on it and it still sells today as a WSO with a less than a 1% refund rate - which tells me it's still relevant and high quality.

I was lucky enough to follow that up with an interview with the great backlinks masters, Terry Kyle and Tom Goodwin. In February, we recorded "Backlinks Round Table" - 3 hours of extremely valuable SEO information, mostly pertaining to getting the best possible backlinks. It's clear that these guys really are at the top of the industry and I feel quite fortunate to have scored that interview and to have become friends with them both.

Just recently, Terry launched his new product, "Backlinks Hydra", which is in my opinion, the greatest achievement in SEO, possibly ever. A week before the launch, we recorded Session 2 of Backlinks Round Table. This is an hour of the most groundbreaking SEO information available. Anybody who says this isn't just lying (fittingly, nobody has claimed such!).

I can say this and not sound like I'm bragging because honestly, I'm not the one giving the information. It's all Terry and Tom. This amazing interview revealing some jaw-dropping stuff is currently available for \$1 as a WSO.

Octopus Blog Method ==> [Click Here To Check Out!](#)

Backlinks Round Table ==> [Click Here To Check Out!](#)

4. How did you come up with the idea for this kind of product or service?

I got the idea for the "Octoblog" from my own personal testing that stemmed from theories about backlinks to specific pages and backlinks to the overall domain. It only seemed obvious to me that if you had a huge opportunity in a niche with many keywords, that it would be advantageous to build one bigger site as opposed to many smaller ones. That turned out to be true and I wrote the book.

Towards the end of 2009, I learned about Terry Kyle and his strategies and I realized that this guy was really onto something. I must have emailed him 5+ times just trying to find ways to work with him but there really weren't opportunities. At the time, I was just starting to really do anything of relevance in the industry, so Terry's reluctance to throw work at me was highly justifiable.

But eventually, I just realized I wanted to ask him a bunch of questions and I somehow came up with the idea to interview him and he immediately agreed. We worked it out and through the gruelling 3-hour session (haha, we took breaks, don't worry!) we became friends and created a fantastic product that is still gaining me recognition from industry names to this day, not to mention thousands of loyal and valuable subscribers.

5. Who is your targeted market for such product or service?

The target market for Octoblog and Backlinks Round Table is pretty much anybody who wants to rank a website in Google. For Octoblog, obviously if somebody knows they're not going to use Wordpress, then the product is not for them. If they just want some general SEO knowledge, want to get started with a winning strategy, or want to learn a different angle to attack SEO, then it's a solid way to proceed.

As far as BLRT is concerned, this is the highest level SEO information you can consume. I know this sounds cocky, but I challenge anybody to prove me wrong. I put these claims all over my sales letters and I have not had one negative review or naysayer (in fairness, I have had a handful of people say that they would prefer to learn by PDF instead of audio - but that is a completely different beast).

If you're a brand-newbie who knows nothing of SEO, this product is probably not for you... yet. If you know the basics, like what a backlink is, then you're good to go. If you're an expert, then you'll appreciate it even more. You will probably walk away humbled after listening to Terry and Tom.

It's still crystal clear that "quality" and quality of backlinks are by far the most important factor in ranking your website in Google (as for the other search engines, I rarely utter their names for they have become increasingly irrelevant). I put quality in quotes because you've got a number of factors to consider such as PageRank, anchor text, IP diversity, security, and many other factors that would contribute to the "quality" of a backlink.

6. What are the 3 most important SEO strategies you like to use for better ranking?

The 3 best strategies I can suggest at this point are:

- 1)** Learn how to place the highest quality "Publicly Viewable Profile" links for the cheapest possible price,
- 2)** Invest in "homepage backlinks" that Terry talks about in Backlinks Hydra and,
- 3)** Consider building a network of high PR sites where you can place your own links to gain ultimate security and an advantage over the marketplace.

I truly believe that between Backlinks Round Table 1 and 2 and Terry's Backlinks Hydra, you will have 99% of the information that you need. The remaining 1% is about on-page SEO, a subject that is easily learned and implemented.

7. Can you tell us about the single most important SEO MISTAKE you should have avoid in the process of ranking high in the search engine?

The worst thing you can do in SEO is pay a lot of money for backlinks that don't do anything. The second worst is paying a lot for links that DO something. The best strategy overall is to pay very little for the best links. In SEO, it is so easy to run through money without seeing results.

Make sure your budget can sustain your backlinking for at least 3-6 months, depending on the strength of the competition you are going after.

8. Anything you want to add on?

Oh and I should mention, the OTHER worst thing you can do is try to win an "unwinnable" SEO fight. Going after the keyword "credit cards" or "payday loans" is literally throwing money and time down the drain. This is true for many other keywords. It is so important to understand how to evaluate competition and to go after "reachable" #1 spots. And as Terry says... if you're not going for #1 then you are pretty much wasting your time on that keyword.

I just want to say thanks Winson for asking me to participate in this project. I'm sure you will get many awesome insights and valuable resources suggested for your subscribers.

Backlinks Round Table ==> [Click Here To Check Out!](#)

Interviewer 8: Andy Fletcher's Email Interview

1. Can you give us some background on yourself?

My background is all software development and management. I've used just about every programming language and platform going but I get bored easily so I've started branching out into marketing and running my own business rather than just being a cog in someone else's system.

Mostly my focus is on developing information products or software that makes people's businesses easier to run. SEO is a prime field for that since there is so much misinformation and software that doesn't really do anything useful. I feel it's somewhere I can help a lot of people out.

2. How did you first get started in Search Engine Optimization (SEO)?

While I've been aware of SEO for as long as search engines have been around (I'm an uber geek after all) I only really got into it in a hardcore way about 3 years ago. I was working for a "new media" start up (that's a polite way of saying company that wanted to do stuff online but didn't really know what) and they landed a contract with a celebrity management agency. The celebrities they managed had received a lot of bad press and the sites that were ranking for their names were all unofficial "fan" sites that profited more off rumour and intrigue than any actual news about the celebs.

The agency wanted to create a line of official sites, one for each celebrity, so when people started gossiping and rumour mongering they could publish the official line. Part of this was that they wanted to rank the celebrity sites for just about every related keyword they could come up with, which was a significant undertaking.

As generally happens in a start-up, the reason I was assigned the task was nothing to do with any actual knowledge of SEO but that I had more than those around me ... ie I'd heard of it and they hadn't. So I went on a massive learning curve, which at the time was made so much harder because the level of information that's around today just wasn't. So I learned a lot by trial and error and finally started seeing some significant results for what was an incredibly competitive area.

3. Background of your product/service and how will it benefit the reader?

My most recent product, WP Syndicator, is all about generating authority backlinks to each of your Wordpress blog posts. It will automatically syndicate every post you make out to over a dozen web2.0 sites. Increasing exposure for your content, building backlinks and growing niche follower lists on micro blogs such as Twitter.

WP Syndicator ==> [Click Here To Check Out!](#)

4. How did you come up with the idea for this kind of product or service?

The technique itself is nothing new. I doubt anyone would argue that syndicating your content to web2.0 sites is a bad thing to do but until now that's been time consuming and not particularly practical. The free options out there will let you do it but they don't let you do things like keyword targeted anchor text in your blog posts so for anyone doing SEO seriously, they're not really an option.

5. Who is your targeted market for such product or service?

If you run one high value blog or 1,000 auto blogs you can benefit from using WPSyndicator. It's an incredibly simple concept and most importantly it's "Just Worked" for thousands of people who have already bought it.

6. What are the 3 most important SEO strategies you like to use for better ranking?

1. Links from authority sites (mostly web2.0 sites).
2. High link volume channelled through those authority sites.
3. Rapid Indexation to make those links count as quickly as possible.

7. Can you tell us about the single most important SEO MISTAKE you should have avoid in the process of ranking high in the search engine?

Waiting around to see results. SEO is far better understood than it was a couple of years ago but there's still an element of black magic voodoo involved. If you just do one thing and wait to see results, you'll never see any real success with it. It's absolutely vital to get out there and start building and just check in once a month so you can make minor course corrections.

8. Anything you want to add on?

I guess this is another "Common SEO mistake" and that's buying all the latest systems, gadgets and gizmos without having a solid understanding of the fundamentals. So many products are hitting the market at the moment that focus on some really "thin value" topic and make it sound like the only thing you need to do to rank. When in reality 99% of SEO comes down to this –

Target one keyphrase per page – include that keyphrase on the page a lot, title, headings, content etc

Build lots of links to that page using the keyphrase as the anchor text.

WP Syndicator ==> [Click Here To Check Out!](#)

Interviewer 9: Shane Hunter's Email Interview

1. Can you give us some background on yourself?

Well, I'm Shane Hunter – I'm 29 years young, I'm married and living in sunny southern California USA. I'm originally from Canada – and made the choice to move to the US for the same reason that most immigrants move here – for opportunity. =)

I've done many jobs in my life, and have NEVER enjoyed any of them – except for when I work for myself. I went to college, but never finished because it simply could not keep my interest. I always knew that there was something 'different' that I was supposed to be doing. I definitely value education, but think I found my self-education far more valuable than any institutional education that I've ever experienced. I'm a business builder and an investor in my future.

My self-education included books like Rich Dad Poor Dad, Magnetic Sponsoring; courses like Frank Kern's Mass Control, SEO Networker, and by listening to speakers like Anthony Robbins to maintain the motivation to do something that not a lot of my friends understand. I am an internet marketer who has a goal of helping people and hopefully making some money along the way.

2. How did you first get started in Search Engine Optimization (SEO)?

I first got started in SEO well over 10 years ago. The internet was still relatively fresh and new (back in Canada) and my best friend at the time, and myself got into web design using an early instance of Dreamweaver and a few other programs. Even back then, there were a few 'standards' that needed to be complied with to create an online experience worth talking about.

I took time off from this venture to go to University and take marketing and psychology, but eventually found my way back to internet marketing when I later started my own landscaping business. I needed to generate leads, and the internet was the most cost effective way of generating mass exposure in a short time.

So, for the last 5 years (I closed the landscape company, and decided to pursue marketing full time) I've been laser-focused on SEO (both Onpage and Offpage) as well as SEM (Search Engine Marketing) because ranking without quality content and sales copy doesn't mean a whole lot. =)

3. Background of your product/service and how will it benefit the reader?

My services are in the SEO and SEM realm. I have techniques and strategies up my sleeve that have proven time and time again to dominate competition and achieve highly responsive top rankings. Recently I also designed a product called “Link Velociraptor” which is a piece of link indexing software that my users have experienced a LOT of success with.

Currently I’m developing a personal network that clones the main web 2.0 site used in the system currently – so that we can completely eliminate account deletions that plague web 2.0 while still maintaining the same effectiveness. It’s an expensive and long uphill battle, but it’s worth it to help my subscribers at the end of the day.

Each and every one of your links passes directly through 3 random (different combinations EVERY time) high PR pages (not sites - but yes, actual HIGH PR pages) [we're talking pr's of 4-6...]

It's as easy as adding a couple of keywords related to your niche, throwing your backlinks in a text file, and hitting the big shiny GO button (via: cron job)

Imagine the ability to NOT ONLY do this with your links, but to be able to do this with autoblog posts, BIE posts etc... Once again, all on autopilot.

Sick right? Yup. It's the next generation in backlink boosting and indexing! This is the Link Velociraptor

It's through this system that Google find your backlinks, and makes them count – helping you to rank higher and faster.

Link Velociraptor ==> [Click Here To Check Out!](#)

4. How did you come up with the idea for this kind of product or service?

Backlinks are useless if you can't get them indexed. I am not horribly patient when it comes to making money. =) In my opinion I've had enough patience and am constantly searching out automated ways of doing menial tasks, so that I can focus more on money making matters.

Link Velociraptor came to me after thinking of a way to automate one of my link indexing strategies. Although the idea is straightforward, and not necessarily new – the way that LV gets the job done is unlike anything else out there.

5. Who is your targeted market for such product or service?

My target market – is awesome, and friendly internet marketers – such as yourself. I don't want to work with everyone, because as I learned from Frank Kern – life is TOO SHORT to deal with angry, mean people.

I went into this business so I wouldn't have to deal with those types, and intend not to. Some may consider this silly, when you give up the potential income – but at this point, I'd rather give up thousands of dollars, and live a happy life. =)

6. What are the 3 most important SEO strategies you like to use for better ranking?

Lol. Backlinks, backlinks, backlinks? ;) No, seriously though. Backlinks are crucial. What most people don't realize is how important it is to diversify your link base for any given site. You need profile links, blog links, homepage links, press release links, software links, directory links, article links etc.

Years ago, Google kicked the asses of the internet marketing community. The community that thought they had it all figured out, I think it's only a matter of time till we see the same thing. Google didn't become a billion dollar company by not paying attention. At the same time, don't be paranoid. Build, and they will come, then adjust your strategies accordingly.

If you're going to use black hat techniques, balance them with white hat techniques. Aside from that, make sure your Onpage SEO is top notch, and that whatever phrase you're backlinking for matches the content on the page. Aside from that, try to only tackle 1 or 2 keywords per page on your website. You'll increase conversions, and your SEO success.

7. Can you tell us about the single most important SEO MISTAKE you should have avoid in the process of ranking high in the search engine?

The single greatest SEO mistake is trying not to make any mistakes at all. Thomas A. Edison was once asked, upon failing to invent the light bulb over 1,000 time "How could you stand failure that many times?" His response was that he had not failed, but that he had succeeded in 1,000 ways to NOT invent a light bulb...

The moral is, learn from your mistakes – and capitalize on them. If you spend your time living in inaction, and not DOING you will never get anywhere. Research is good, but at the same time if you don't take one action every single day, you're not moving forward – you're moving backwards.

8. Anything you want to add on?

Nothing else to add, but thanks for the chat Winson, hope my interview wasn't too long and boring. Time to go play with my dogs, and then work. =)

Interviewer 10: Winson Yeung's Email Interview

1. Can you give us some background on yourself?

I was born in Hong Kong. At the age of 7, I moved to Singapore to advance my studies and I got involved in the World of Internet Marketing at the age of 17. Since then, I have been working part-time as an Internet Marketer during my studies and now into a full time Internet Marketer.

The Past - I have spend countless time, effort and also cash in buying products, training courses, WSO, outsourcing and even attending internet marketing events to understand the fundamental of internet marketing such as how to build a list, how to create website, how to use wordpress, how to do SEO, how to optimize your website and etc.

The Present - I have gained lots of knowledge in the Internet Marketing world and my main expertise is in Search Engine Optimization and Affiliate Marketing (Still learning). I have several successful business built-on on autopilot and I'm in process of improving my business and also expanding my business at the same time.

The Future - I will be a millionaire at the age of 27 via my Internet Marketing business. Besides that, I will also be a well known Internet Marketing coach that will teach others about Internet Marketing but at the same time have lots of free-time to enjoy life and travelling around the world with my loved one. 😊

2. How did you first get started in Search Engine Optimization (SEO)?

Back in 2008, I was surfing in the WarriorForum Special Offer (WSO) and I came across Angela backlinks package selling for less than \$5. I grab her backlinks package and start building the profile links manually for my first website www.ccarticles.com targeting keyword “Article Writing Service”.

Within a short period of time (I can’t remember how long it took), I start to see that my Google ranking position is increasing steadily. Even since that, I have start looking for more details in SEO such as Keywords Research, On-Page SEO, Off-Page SEO, Indexing and etc. That’s how I kick started my interest in the SEO when my website is ranking high in the search engine.

3. Background of your product/service and how will it benefit the reader?

My first SEO product is called HighQualityBacklinks, It was created as there’s a strong demand for people wanting to outsource Angela and Paul backlinks package but the problem is that their price is kind of high and a lot of the people are not able benefit from these high PR profile backlinking strategies.

HighQualityBacklinks focus on getting backlinks from website that has a domain Page Rank of at least 4 and above. These high PR site are extremely well loved by the search engine Google and by having a Do-Follow backlinks on such website, it will help to boost up your website ranking and also increase “trust count” factor. Besides that, we are doing the link building **MANUALLY** so that client can be assured of extremely high quality.

After the success of HQB, many customers were feeding back to me that they wanted a more automated SEO service to improve their search engine ranking. That’s when I created the second link building service call Backlinks Automation.

Backlinks Automation works the same from HQB but the only difference is that BA is a membership site where we will create backlinks from high PR domain from different Class C IP Address every month to ensure that there’s a steady raise of backlinks activity in the eyes of Google. It’s really a “subscribe and forget” link building membership as you will only need to enter your submission details ONCE and we will take care of all the manual link building for you.

High Quality Backlinks ==> [Click Here To Check Out!](#)

Backlinks Automation ==> [Click Here To Check Out!](#)

4. How did you come up with the idea for this kind of product or service?

Basically it because these high PR profile backlinks have help my website to achieve higher ranking in the search engine and I want to mass produce such results which pushed me to create my own team of backlinkers to provide such high quality link building service.

5. Who is your targeted market for such product or service?

My service is for anyone who has at least 1 website and would like to rank higher in the search engine for their keywords.

6. What are the 3 most important SEO strategies you like to use for better ranking?

1. Proper Keyword Research – This step is the most important part of SEO. I have seen a lot of people looking to rank high in search engine with very competitive keywords that has millions of results like “email marketing”

I don't recommend this at all as this will take up a lot of time, effort and money to rank for these competitive keywords. My recommendation is to look for long tail keywords that has at least 3 words or above and start optimizing the website to rank for the keywords. Example: “email marketing tool”

2. Proper On-Page Optimization – By optimizing your website such as adding the keywords in the meta-title, description and keywords help to inform Google that your website is talking about your “keyword”. By doing so, you are actually using SEO Leverage to get better results from your SEO campaign. Spend 1 day in your On-Page SEO and you will enjoy long term results from your campaign.

3. Diversify Your Backlinking Campaign – Never only rely on one type of backlinks! You should get backlinks from as many sources as possible such as high PR profile backlinking, article submission, press release submission, blog commenting, forum commenting, social bookmarking and so on. By diversifying your backlinking campaign, you won't need to worry that your website ranking will fall to the pit when Google update its algorithm.

7. Can you tell us about the single most important thing SEO MISTAKE you should have avoid in the process of ranking high in the search engine?

The WORST SEO MISTAKE is by picking the wrong keywords that is over competitive and hoping to rank for it within a short period of time. I have already talked about the keyword research part and why it is important to pick the correct keywords.

8. Anything you want to add on?

Just want to say thank you to you for reading this **Backlinks Inner Circle** and all the email interviewers who spend their time helping me in this project as well 😊

Conclusion

That's it! Congrats on going through the entire interview from the top SEO gurus. I truly hope that this Backlinks Inner Circle report has provided extraordinary value to you and you have pick up something new that you didn't know about before reading these interviews.

A special thank you goes out to David Eisner for his Email Revolution WSO, Terry Kyle and Kok Choon for being the first few to kick start my Backlinks Inner Circle idea and also to all the interviewers who take the time out to take part in this Backlinks Inner Circle. Also, I would like to express a big thank you to the members of Warrior Forum and Backlinks Forum.

If you have opinions on how you feel about this e-book, you can leave a review on my Warrior Forum here (<http://bit.ly/BICWarrior>) or on my Facebook group (<http://bit.ly/SEOInnerCircle>). You can also PM me with your testimonial or email me at winson@backlinksinnercircle.com

And if you liked this e-book, you might also want to take a look at my latest products regarding On-Page SEO because it's the perfect complement to this material and a fantastic method to rank higher for your website in the Search Engine. Subscribe to my newsletter and I will let you know once It's complete! Thank You!

Best Regards,

Winson Yeung
